

Existing products and services

In addition to building new user interfaces, the Web Developer will be responsible for maintaining and updating interfaces, websites and tools for existing Fasthosts products and services.

All new Fasthosts online interfaces must be cross-browser compatible and comply with essential W3C accessibility guidelines. The Web Developer must be able to build standards-compliant interfaces that work across all mainstream web browsers.

Person

The successful candidate will be passionate about designing and building highly intuitive user interfaces.

You will be self-motivated, enthusiastic, flexible, reliable, and capable of working alone or as part of a team.

With a keen interest in internet technologies, you will have a good understanding and experience of web hosting tools and services.

Skills and Qualifications

Essential (highly skilled)

- Highly skilled PHP web development.
- Standards-compliant XHTML and CSS.
- JavaScript.
- Meticulous eye for detail to build pixel-perfect interfaces.
- Adobe PhotoShop – ability to translate visual mock-ups into interactive interfaces.
- User interaction design experience.

Desirable

- ASP.NET development including AJAX.
- ASP scripting.
- MS SQL databases.
- A degree or equivalent qualification in web development or similar.
- Experience and knowledge of web hosting tools and services.
- Working knowledge of W3C web accessibility requirements.

Salary: £30K.
